Work Experience

Web Developer January 2024 – Present
University of Southern Queensland (UniSQ) | Toowoomba, QLD

- Lead development and maintenance of the Northern Australia Climate Program (NACP) website, ensuring 24/7 uptime and reliable access for researchers and the public.
- Collaborate with the Bureau of Meteorology to build and maintain real-time climate data applications including Drought Monitor, Drought Outlook, Cattle Thermal Stress Forecasts (updated 4 times daily), and Green Date calculations.
- Provide technical support and training to new ClimateMates and team members joining the NACP program.
- Support HubSpot CRM users within the team, including setup, troubleshooting, and day-to-day assistance.
- Technologies used: PHP, Python, JavaScript, React, Vue.js, Git, and HubSpot CRM.

Junior Software Developer February 2023 – November 2023

JDM Software | Toowoomba, QLD

- Maintained and enhanced large-scale internal software systems used across the organisation.
- Developed new features and bug fixes using VB, C#, JavaScript, and the .NET Framework.
- Used Azure DevOps for version control and project management; conducted user acceptance testing (UAT).

Junior Software Engineer May 2022 – January 2023

Darling Downs Health | Toowoomba, QLD

- Developed and maintained the Organisational Learning online platform serving healthcare professionals across the Darling Downs region.
- Built full-stack solutions using Node.js, Vue.js (Vuex, Pinia), PHP, and Quasar Framework.
- Customised Moodle LMS for healthcare compliance training, e-learning modules, and reporting.

Prior to relocating to Australia, worked as a web developer and project manager in Nepal.
